Writing (10 points)

200-250 words

lex. lex. The novel is called "Steins; Gate", and the main genre is Science Fiction. It is a work of a Japanese author. The story describes a small friend group, consisting of: Okabe Rintarou, self-proclaimed "Mad Scientist" and the protagonist of the novel; Mayuri Shiina, a childhood friend of Okabe, a sensible, kind girl; and Kurisu Makise, a self-proclaimed "Super Hacker", a huge pro of computers. Together, one day they accidentally create something resembling a real time machine. A device that can alter the course of history by sending messages to the past.

орб. гр. X The main appeal of the book, and also what made me love it so much, is, without doubt, how well they described the process of time travel, the "Butterfly Effect", and how continuous time travel can affect a person's mind. It also touches upon some interesting science subjects, that, in my opinion, can be quite interesting even to younger generations.

✓ (For example) Kerr black holes. It is a type of black hole, that is constantly spinning, and their singularities are visible. 166

гр. This novel describes very well how a person feels while time traveling. Repeating the same scenarios over and over, desperately trying to change the tragic course of a life, fighting against fate itself. This novel can raise people's interest in science, which is really great. It can also show various emotions and troubles time travel might cause.

lex. You try fixing something, but in turn, you mess up something else due to the "Butterfly Effect". Fate is merciless, and this novel shows it very well.

lex. For those who don't like reading, there are also adaptations of this novel in forms of Manga and Anime.
